

Lead & Copper Rule Monitoring and Reporting Violation – Mandatory
Language – Tier III
IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

CITY OF TRINITY WSC PWS 2280002 has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During (53) 1st 6M2023, we did not monitor or test for LCR and therefore cannot be sure of the quality of your drinking water during that time.

The contaminant(s) we did not properly test for during the last year, *LCR Water Quality Parameter 1st 6M2023*; how often we are supposed to sample for [6/6 month) contaminants], how many samples we are supposed to take (6), how many samples we took (0), when samples should have been taken (*JAN 1, 2023 - JUNE 30, 2023*), and the date on which the follow-up samples were [or will be] taken (date) 12/22/2023.

What is being done?

[corrective actions] We collected a complete set of Water Quality Parameter samples, sent the results to TCEQ as requested and we returned to compliance as of 12/22/2023.

Please share this information with all other people who drink this water,
